## USDA Organic Hemp Nursery Products | Agricultural Services

Proven Success in the Marketplace

Exceptional Seed to Harvest Support

Reliable & Uniform Cultivars

### What We Do

We specialize in cultivars that deliver craft hemp flower with proven performance in the field and in the marketplace. Each year we provide high quality, rare cultivars, from our farm and research center in Southern Oregon. We are proud to be one of the first hemp nurseries with USDA Organic Certification.

- Organic certified feminized seedlings at their peak of perfection; delivered nation-wide.
- Exceptional craft flower cultivars that make your product line stand-out from the competition.
- Thoroughly tested quality seed; always rigorously trialled before release.

We are a team of growers, scientists, and engineers dedicated to developing best-in-class hemp for farms across the U.S.

As industry leaders we conduct rigorous evaluations of practices and products, lecture at conferences and provide educational workshops. At our farm and research center we develop and test new cultivars. We take pride in working with our clients to provide them with the right plants to make them successful in the field and in the marketplace.

### OUR STORY

East Fork Cultivars is known nationally for exceptional craft hemp flower, achieving accolades for highly desirable and marketable cultivars. Year after year their products earn a high price point, sell out, and win awards in competition. We have found in East Fork Cultivars a partner that shares our commitment to sustainable agriculture and field trials to ensure the production of reliable and exceptional craft hemp.

# BLUE ORCHID

## BLUE ORCHID

Blue Orchid debuted at the 2019 Cultivation Classic and is a top seller in the boutique flower market. We are proud to release Blue Orchid to you for this season.

Producing a visually stunning flower, Blue Orchid was bred specifically for its' unique terpene profile and blue-purple hue. Blue Orchid exhibits a beautiful painted flower that is true to its' name. The resulting terpene profile is complex, tropical, and not quite like anything you've smelled before with dominant notes of Ocimene and beta-Caryophyllene.

In the field Blue Orchid presents with numerous apical colas of similar girth to the dominant apical; the finished flower is uniform in size, color and density.

- Stunning bag appeal with a complex, tropical-orchid aroma
- Uniform population of high-yielding plants with numerous and thick colas
- Top selling boutique flower since 2019

### Photos, Videos & Samples Oh My!

We are excited to share a complete portfolio of photos and videos with you, and share flower samples for you to review.

Reach us at 541.937.5237 or at [hello@infinite-tree.com](mailto:hello@infinite-tree.com)

### Benchmarks

Plant Structure	Numerous strong apicals on bushy structure topping out at 6' in height.
Bud Structure	Stunning pyramidal medium-dense finished flower that stands out.
Terpene Intensity	1.99%; Intense tropical-orchid aroma story that is unique and alluring.
Field Variation	Uniform population of painted blue-purple flower that matures evenly first week in October at 42°N

# PALOMA SPICE

## PALOMA SPICE

Loud and complex, you will experience intense notes of grapefruit, blood orange and lime zest followed by a warm mix of pink peppercorn. Like a well-made Paloma cocktail or citrus-pepper rubbed steak, Paloma Spice delivers a pleasurable experience.

In the field Paloma Spice is outstanding. Paloma Spice matures the 3rd week of September with dense flower throughout all colas; this dense, sticky flower cures into 'rocks in a bag'.

- Intense and sticky, the flower yields a complex citrus and pepper profile with 13.5% CBD and 3.33% terpenes.
- Early maturing and dense flower is easy to trim for smokeables or process for fresh frozen.

### Benchmarks

Plant Structure	Dominant apical with 'table top' upright habit of equally thick strong colas reaching just under 6' tall.
Bud Structure	'Rocks in a bag' pyramidal flower that sparkles, easy to trim.
Terpene Profile	3.33%; beta-Ocimene dominant. Luscious and complex aroma story of citrus and pink peppercorn that is unforgettable.
Field Variation	Even mix of bright greens and green-painted flower, otherwise uniform in all categories. Harvest 3rd week of September at 42°N.

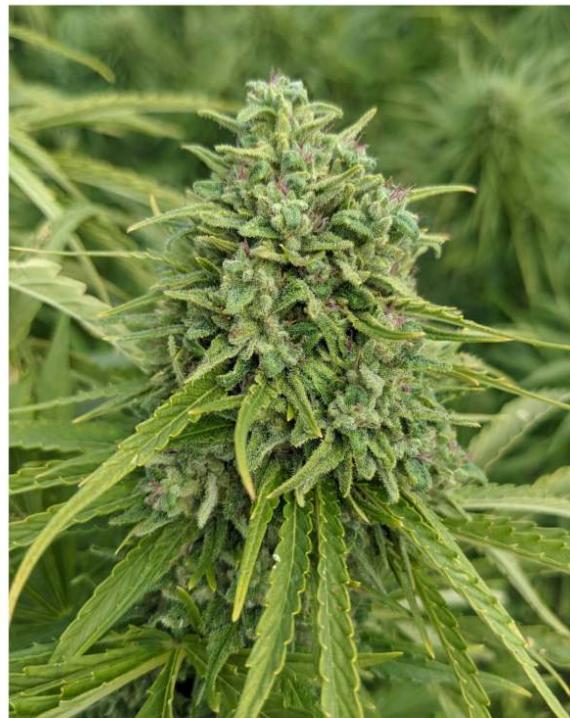

# SOUR PINEAPPLE

## SOUR PINEAPPLE

This is a rare opportunity to produce the loudest cultivar on the market. Sour Pineapple transports you with the aroma of sticky, fermented sour pineapple. You realize quickly that the plants are also showstoppers with solid colas that connect large, dense buds, along the entire branch. Harvest last week of September.

- Qualitatively and quantitatively intense; 19.2% CBD and 3.75% terpenes.
- Dense pyramidal buds across a uniform population in the field.
- High yielding, vigorous plants at 5' tall produce exceptional smokeable and fresh-frozen products.

### Benchmarks

Plant Structure	Dominant apical with open branch structure. Strong lateral branching that stands up to heavy storms, even when in full flower.
Bud Structure	Dense pyramidal buds mostly in wide contiguous colas tending towards lime-green finished flower. Presents well in a jar and full-spectrum extracts.
Terpene Profile	Sticky fermented pineapple, sour-sweet with a little funk. Complex notes of gas, tropical fruit, and citrus; 3.75% terpenes.
Field Variation	Very uniform in every category; harvest last week of September at 42°N.

“Emily and her team are rigorous judges of quality. Infinite Tree's research pipeline routinely delivers dynamic cultivars, and they're a joy to work with.”

*Mason Walker, East Fork Cultivars*

# PINEAPPLE KUSH

## PINEAPPLE KUSH

Sweet as a golden pineapple, Pineapple Kush delivers with large, dense buds. Popular across the U.S., this cultivar delivers in the field, featuring thick apically dominant colas and lower secondaries that are nearly as thick, just as dense, and mature all at the same time! Expect frosty and dense inner colas that deliver full bags of 'bigs'.

- Intense and sticky, the flower yields a complex and balanced profile of ripe tropical fruit with 14.3% CBD and 3.38% terpenes.
- Good-looking on the shelf with an intense and unique aroma profile made this a stand-out in the 2022 and 2023 craft flower market.
- Thick colas connect down sturdy branches from top to bottom, including lower secondary colas.

### Benchmarks

**Plant Structure** Dominant apical with numerous well supported colas top to bottom; solid 5' tall x 4' wide.

**Bud Structure** Dense, large, uniform flower with a mix of greens and deep purples is eye-catching on the shelf.

**Terpene Profile** 3.38%; Loud yet balanced notes of sweet pineapple with fruity candy and gass.

**Field Variation** Even mix of greens and deep purples, otherwise uniform in all other categories. Harvest last week of September at 42°N.

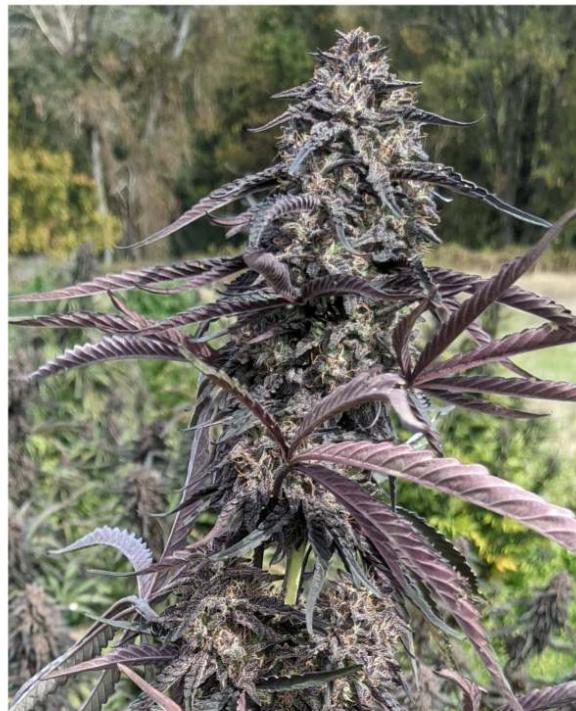

# BLUE MAGNOLIA

## BLUE MAGNOLIA

Lush and juicy, Blue Magnolia is delicious. Heavy notes of red nectarine, mixed berry jam and vanilla wrap around you from start to finish. Buds are dense, which clients describe as 'rocks in a bag'. Blue Magnolia features sturdy colas of stacked flower that is uniform from top to bottom. Be sure to check out our videos online, Blue Magnolia has excellent qualities in the field. Intense and delicious with 14.8% CBD and 3.35% terpenes.

- Saturated flavor and complex aromas; high levels of Ocimene contribute to its' unique profile.
- Dense pyramidal buds across a uniform population in the field.
- High yielding sturdy plant with well supported heavy and frosty secondary colas.

### Benchmarks

Plant Structure	Dominant apical with open branch structure. Strong lateral branching that stands up to heavy storms.
Bud Structure	Uniform thickness from top to bottom on a stacked cola; 'rocks in a bag'
Terpene Profile	3.35%; Lush and juicy with heavy notes of red nectarines, mixed berry jam and warm vanilla.
Field Variation	Population is 90% purple and 10% green, otherwise uniform in all categories. Matures first week of October at 42°N.

"Always great to work with Emily and her team, they deliver quality products and work closely with me to meet my needs." *Les Bruner, HempWorldWideshop.com*

# RESOURCES

## Detailed Agronomic Information

Our team wants to hear from you! Give us a call. We want to learn about your farm, and your needs, so that we can provide recommendations based on current agronomic research. Site design. Cultivation. Harvesting through post harvest. Please get in touch, we are here to help and love talking hemp agriculture.

### Our Products

Feminization & Purity	Lab tested for feminization. All of our seed is produced indoors in controlled facilities.	Photos	We have many photos of each cultivar throughout development.
USDA Organic Seed & Seedlings	From start to finish, our products are produced using standards that exceed USDA Organic certification requirements. Just ask for details!	Videos	Cultivar walk-throughs in the field.
Availability	Our cultivars are produced as limited editions, available for cultivation by only a handful of farms.  We ship nationally; pickup is also available from our farm.	Fall Showcase	A special event in the Fall at our research center to assess our cultivars in person.
Market Relevance	Rare, high-quality, craft hemp flower ensures that your product stands-out from the competition. New releases with proven market performance every year for dried flower and fresh frozen.	Craft Flower Samples	Request your samples today.
Field Tested	Even for scientists, we collect a lot of data, before releasing a cultivar to the nursery market. Get in touch, we are happy to share what we know.	Customer Testimonials	Call for additional references.

We look forward to hearing from you!
